Problem Solving
1. \( \frac{2}{5} \) 2. 18.5 3. ₹ 29 4. ₹ 105
6. HOW WE GET OUR FOOD

- 1. energy  2. manure
- 3. pesticides  4. bullocks

- 1. Answer of this question should be attempted by the students themselves.
- 2. We get cereals, pulses, fruits, vegetables, spices, oil seeds, tea, coffee, sugar etc. from plants.
- 3. Farmers use wells, tube wells and sprinklers to water their fields.
- 4. Food grains, vegetables and fruits are produced in the countryside. From the field, they are transported to the market. In olden time, bullock carts were used as means of transport but now trucks, goods trains and ships are used. They carry food grains from one place to another. These food grains are sent to wholesale market in cities. From here, they are sent to retailers in different cities.

Think and write

1. Turmeric (Haldi), clove, cinnamon, black pepper, cardamom, are used as spices in our home.
2. Seeds – Cumin, coriander, fenugreek, ajwain
   Bark – Cassia, cinnamon
   Leaves – Basil leaves, green cardamom
   Roots – Turmeric
3. Answer of this question should be attempted by the students themselves.
4. Answer of this question should be attempted by the students themselves. Options may be sunflower oil, soybean oil, mustard oil, safflower, coconut oil, vegetable oil, etc.
5. Mustard seeds, sunflower seeds, groundnut, coconut, etc. are used for extracting cooking oil.
6. Farmer grows cereals, pulses, fruits and vegetables for us.
7. Answer of this question should be attempted by the students themselves.

7. TONGUE AND TEETH

1. T 2. T 3. T 4. T
1. taste buds 2. milk teeth 3. grind 4. biting
1. We have four types of permanent teeth – incisors, canines, premolars and molars.
2. We can prevent tooth decay by taking proper care of our teeth. Proper care requires a good diet and cleaning the teeth after eating.
3. Both tongue and teeth are used together to form many sounds that make up words. To produce ‘th’ sound, for example, the tip of the tongue is placed against the upper front teeth. A person who lacks these teeth may be unable to make ‘th’ sound.

Think and write
1. We can taste different foods with the help of different types of taste buds present in our tongue.
2. Answer of this question should be attempted by the students themselves.
3. Teeth help us to chew food. As the teeth chew the food, it is mixed with saliva, a liquid produced in the mouth. The food becomes a moist pulp, which is easy to swallow.
4. Answer of this question should be attempted by the students themselves.
5. All the teeth are not similar.
6. The milk teeth is the first set of teeth whereas permanent teeth is the second set of teeth. The milk teeth begins to appear when a child is about 6 to 9 months of age, whereas permanent teeth appear in the age of 6 to 12 years.
7. The sounds in which both tongue and teeth play a part is ‘th’.
8. TEETH, BEAKS AND CLAWS

- 1. chewing  2. Carnivores  3. beaks  4. broad  5. Ostrich
- 1. Woodpecker find its food with the help of their strong chisel-shaped beak. It taps the bark and the sound tells it if there is a hollow space or not in the bark.
- 2. Different birds have different kind of beak because they eat different kinds of food.
- 3. Functions of claws are to:
  (a) Help birds to catch their prey.
  (b) Hold prey firmly while flying.
  (c) Protect the birds from enemies.
  (d) Help birds to move about.
- 4. A perching bird has three front toes and one hind toe, which curls round the branch and holds it firmly even when they are asleep.
- 5. Yes, the shape of claws of a bird is related to the food it eats.

Think and write

1. No.
2. Elephant uses its tusks to dig for food and to fight. The tusks can lift and carry a load weighing almost a metric ton.

9. GARBAGE AND ITS DISPOSAL

- 1. Recycle, Reuse, Reduce  2. Recycling  3. manure  4. wastes
- 1. Waste generated from homes such as sewage, kitchen waste and garbage are called domestic waste.
- 2. In urban areas more waste are produced due to following reasons:
  (a) The urban people use comparatively more things in their daily life.
  (b) Population of a city is always more than a village.
(c) In cities, people buy a number of packed items such as biscuits, butter, chips, chocolate, etc. The packing materials are thrown away as wastes.

(d) There are a number of industries in urban area producing many kinds of wastes.

3. The three R’s stand for Reuse, Recycle and Reduce.

4. Recycling means changing of old materials into new goods. It conserve natural resources and reduce energy use.

5. Compost is rich organic manure which is helpful for the growth of plants. Left over food, grass, rotten fruits, leaves, etc. are used to make compost.

Think and write

1. Packed materials such as biscuits, butter, chips, chocolates, maggi, namkeens, noodles, cooking oil, flour, spices are purchased in our house. We throw the packing papers in the dustbin.

2. Yes/No (optional).

3. My mother collects all the garbage and waste of the home in polythene bags and dispose the bags in dustbins installed by the municipality in our colony. The recycled products which we use are metals (aluminium, iron, etc.), glass, paper and plastics.

10. ANIMALS’ HABITAT AND SHELTERS

- 1. terrestrial 2. trees 3. night
- 4. flippers 5. lungs, skin

- 1. Lion, tiger and elephant are the animals that take shelter in natural homes.
- 3. Bat is the only mammal that can fly.
- 4. Animals that spend their lives partly in water and partly on land are called amphibians.

- 1. (d) 2. (c) 3. (e)
- 4. (a) 5. (b)
1. Spiders spin web to catch the insects.
2. Cockroaches come out only at night to avoid the heat of the day.
